2. Inventory
3. Services
4. Suppliers
5. Accounting
6. Project Management
7. Human Resources
8. Collaboration

1. Customer Relationship Management (CRM)

The CRM module is named the 'Stakeholder' module in ERPbyW. This is due to that the data saved in the module is used to identify all entities with which an organisation encounters while doing business. The specific entities currently covered include 'Clients' and 'Partners'.

Linked Modules

Stakeholders are used in the Accounting module when creating an Invoice, Quotation or Receipt. They are also used in the Project Management module where a Stakeholder can be defined for the project.

Create New Stakeholder

To create a new Stakeholder record, on the menu click 'Stakeholder - New'.

Capture all required and/or available data then click on the 'Save button'.

Edit Stakeholder

To edit a Stakeholder, on the menu click on 'Stakeholder - Edit'.

Enter the Name and/or Surname of the Stakeholder then click on 'Search'.

Several search results may appear in the list based on the search criteria entered hence it is best to capture the full name and surname for more accurate results.

Click on the record you want to edit and you will redirected to a page displaying the Stakeholders details.

Hover your mouse over the buttons at the top and locate and click the 'Edit' button.

Edit the details you wish then click on 'Save'.

Delete Stakeholder

To delete a Stakeholder, on the menu click on 'Stakeholder - Edit'.

Enter the Name and/or Surname of the Stakeholder then click on 'Search'.

Several search results may appear in the list based on the search criteria entered hence it is best to capture the full name and surname for more accurate results.

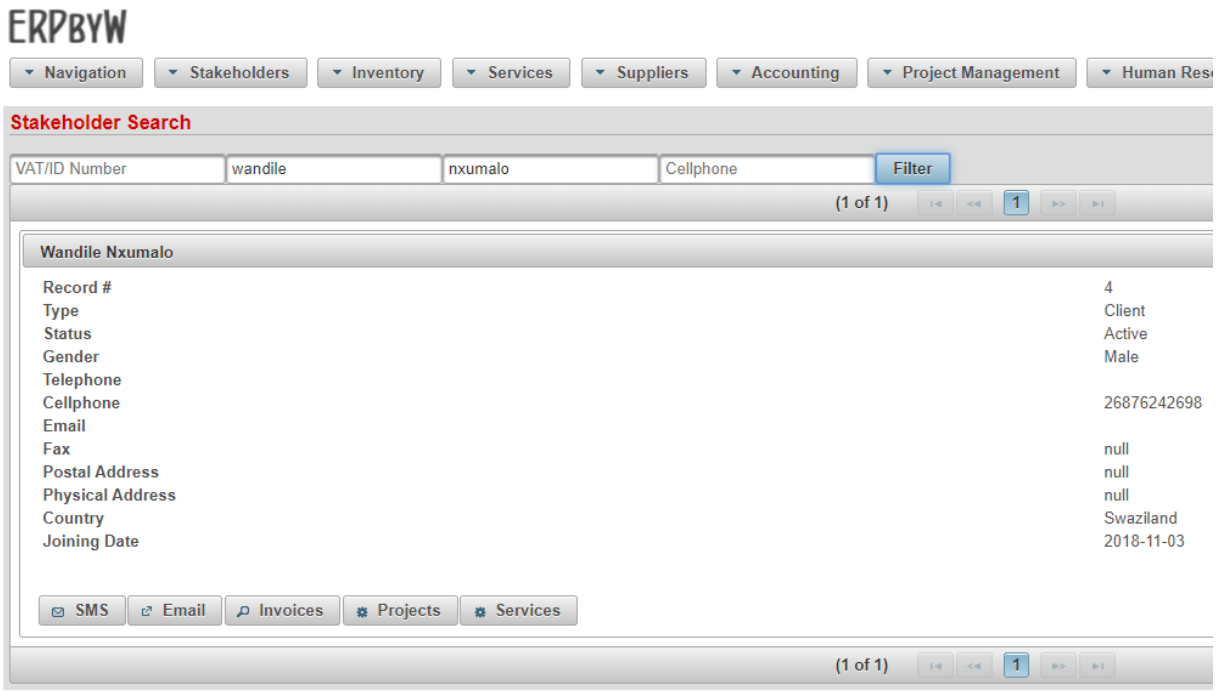

Click on the record you want to edit and you will redirected to a page displaying the Stakeholders details.

Hover your mouse over the buttons at the top and locate and click the 'Delete button.

View Stakeholder Details

To view details of a Stakeholder and all their interactions which have been recorded in the system, click on 'Stakeholder - Search'.

You will be presented with a screen allowing you to enter search criteria. Enter the search criteria and click on 'Filter'. Several matching results may be returned based on your search criteria.

The record you would like to view will display the personal details of the Stakeholder, and buttons enabling navigation to functionality for;

1. Sending an SMS
2. Sending an Email
3. Viewing Invoices that have been generated
4. Viewing Projects in which the Stakeholder is taking part
5. Viewing the Services to which a Stakeholder is enrolled.

<u>Sending an SMS</u>

This is a subscription based service and has to be enquired about if interested for a quotation.

<u>Sending an Email</u>

An email can be sent by click on the 'Email' button which will display a pop-up allowing the user to capture the subject, message and send the email.

Invoices

This will display a listing of all Invoices which have been created for the Stakeholder in the system. Once the list is displayed, a single invoice record can be clicked. This will redirect the user to a complete copy of the Invoice that was generated. Once the complete Invoice is displayed, the user can;

1. Print the Invoice
2. Create a Receipt for the Invoice; considering that the Invoice was generated and no money paid, so each time a payment is made a receipt is also generated.

The system will automatically calculate penalties for the 30 and 60 days if the Invoice has not been paid in those periods. The penalty percentage is defined by the user in the Administration module.

Projects

This will display a listing of the Projects where the Stakeholder has been defined as a Stakeholder. Click on the project for which you would like view more information and the Project Management module will be opened with the selected project data displayed.

Services

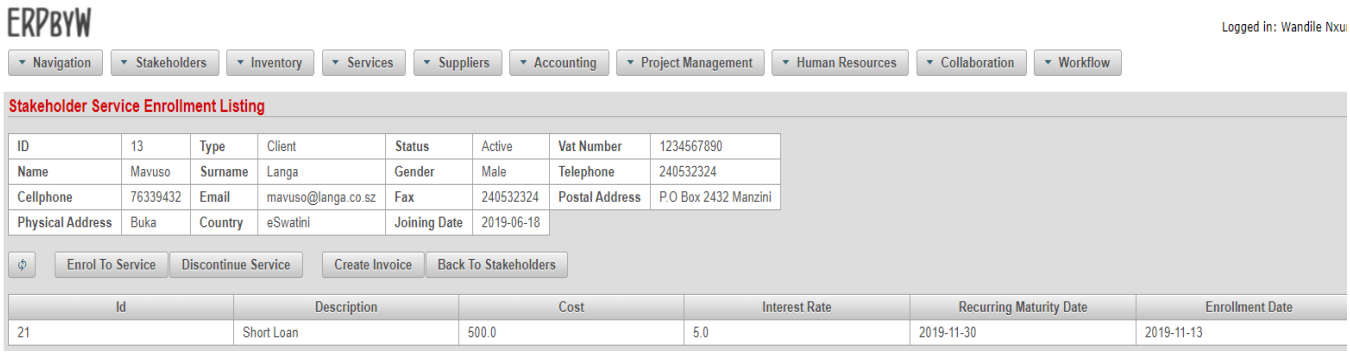

The system enables for a Stakeholder to be enrolled into a service. When enrolled into a service, this means that a Stakeholder has committed to actively making use of the service and will be liable to make payments monthly or at specified periods. Examples of services being enrolled to are;

- Rentals
- Loans
- Professional Services

Clicking on the 'Services' button will display a screen where all the Enrolled Services are managed.

The Services that your organisation provides need to be defined in the Services module for this sub-module of the CRM to work.

The Stakeholder details are displayed at the top of the page.

To enrol a Stakeholder to a service, click on 'Enrol To Service'. On the screen that appears, select the Service from the dropdown list enter all the details (Interest Rate if applicable) then click on 'Save'.

The Recurring Maturity date is when an Invoice will be generated for the service each month and when the interest will be applied if applicable.

You may need to click on the Refresh button after saving to view the new record.

A Stakeholder can be discontinued on a Service by first ensuring to click on the Stakeholder, then clicking on the 'Discontinue' button.

To Invoice a Stakeholder for an Enrolled Service, click on 'Invoice'. The following process will automatically add the service to an Invoice, allow the user to optionally add any Inventory to the Invoice, then save the Invoice.

2. Inventory

The Inventory module is where the details of an organisation's Inventory or Stock are defined.

Linked Modules

Inventory is used in the Accounting module when adding items to an Invoice, Quotation or Receipt. In the Project Management module, Inventory is consumed in Project Activities.

Create New Inventory

To add new Inventory, from the menu click 'Inventory - New'. The user will have an option to select a supplier from those defined in the Suppliers module. Capture all details then click on 'Save'.

View, Edit or Delete Inventory

To view all details of an Inventory item, and Edit or Delete the item; from the menu, click on 'Inventory - Search'. Enter the Code and/or Description of the Inventory then click on 'Search'. Several search results may be returned based on your search criteria. Select the item you would like to view and you will be automatically redirected to a screen displaying the details.

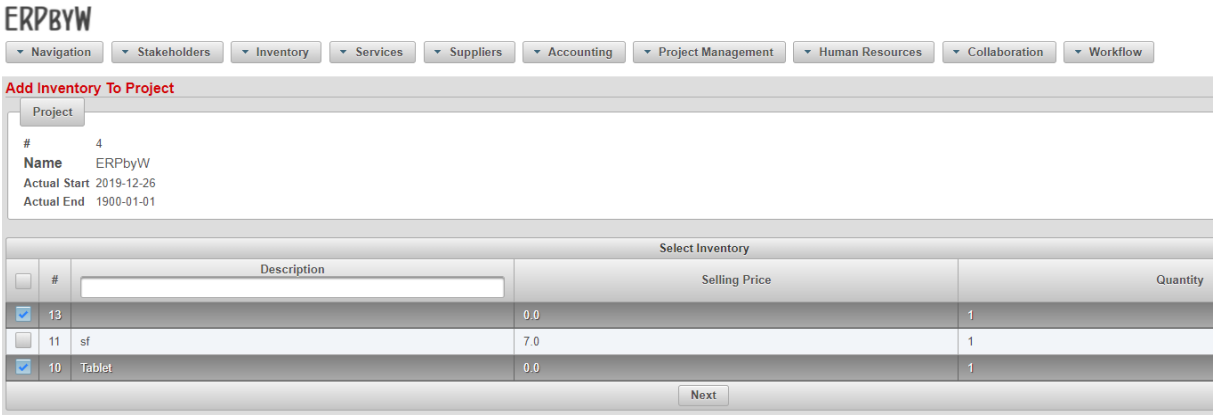

Hover over the buttons on the top left of the details to identify their purpose. To delete the Inventory, click on the Delete button. To edit a record, click on the Edit button, alter the details then click on 'Save'.

Adding Inventory to a Project

During the course of a project, the organisation carrying out the work often needs to make use of materials or inventory. Any item used up during a project by the contracted organisation can be added to the Project for inclusion in costing through this module.

To add Inventory to a Project, from the menu click 'Inventory – Add To Project'. A listing of all current projects that the organisation is undertaking will be listed. Select the project for which you would like to add Inventory by clicking on the tick to the right of the Inventory.

Inventory can only be added to a specific Activity of a Project, hence the Activities of the selected project will be displayed. Select the specific Activity that you are adding Inventory for by clicking the tick. You will then have to select all the Inventory you are adding to the Project then click on 'Next'.

The Inventory will now be added to the Project and will reflect in the Project Costing.

3. Services

The Service module is where the details of the Services an organisation offers are defined.

Linked Modules

Services are used in the Accounting module when adding items to an Invoice, Quotation or Receipt. They are also used in the Stakeholder (CRM) module; where Stakeholders can be Enrolled to Service.

Create New Service

To add a new Service, from the menu click ‘Services - New’. Capture all details then click on ‘Save’.

View, Edit or Delete Service

To view all details of a Service, and Edit or Delete the item; from the menu, click on ‘Services - Search’. Enter the Code and/or Description of the Service then click on ‘Search’. Several search results may be returned based on your search criteria. Select the item you would like to view and you will be automatically redirected to a screen displaying the details.

Hover over the buttons on the top left of the details to identify their purpose. To delete the Service, click on the Delete button. To edit a record, click on the Edit button, alter the details then click on ‘Save’.

4. Suppliers

The Service module is where the details of the Services an organisation offers are defined.

Linked Modules

Suppliers are listed for selection in the Inventory module so that when creating an Inventory item, it can be clearly defined from which supplier it is sourced.

Create New Supplier

To add a new Service, from the menu click ‘Services - New’. Capture all details then click on ‘Save’.

View, Edit or Delete Supplier

To view all details of a Service, and Edit or Delete the item; from the menu, click on ‘Services - Search’. Enter the Code and/or Description of the Service then click on ‘Search’. Several search results may be returned based on your search criteria. Select the item you would like to view and you will be automatically redirected to a screen displaying the details.

Hover over the buttons on the top left of the details to identify their purpose. To delete the Service, click on the Delete button. To edit a record, click on the Edit button, alter the details then click on ‘Save’.

5. Accounting

The Accounting module contains several modules enabling the management of books. The module enables the definition of Accounts to represent all the different possible transactions which can occur within an organisation. There are several sub-modules representing specific accounting functionality. These include Invoice, Quotation and Receipt modules.

Linked Modules

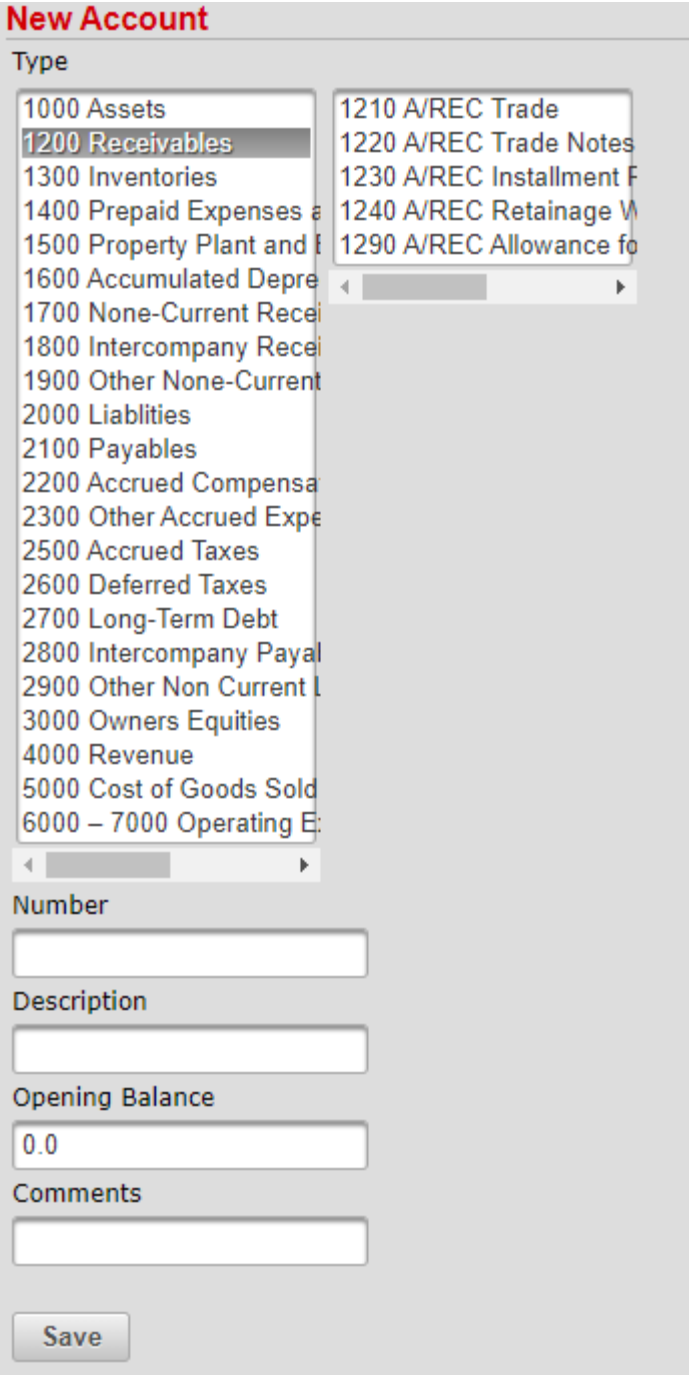

The Accounting module is linked to the Inventory, Services, Suppliers, Human Resources and Project Management modules where;

1. Inventory and Services are consumed during the creation of an Invoice, Quotation or Receipt.
2. The Suppliers module interacts with Accounts during the Supply Chain when payments are made.
3. The Human Resources module males use of specified Accounts to deduct from when processing Pay Slips.
4. The Project Management module makes use of specified Accounts to add into when processing Project Costing payments.

Create New Account

To create a new Account, from the menu click on ‘Accounting – New Account ’.

The Account Types are pre-defined and contain all standard accounts.

Select the Account Type ensuring it properly represents the account you are defining and enter all the relevant or required fields, then click on ‘Save’.

Accounting

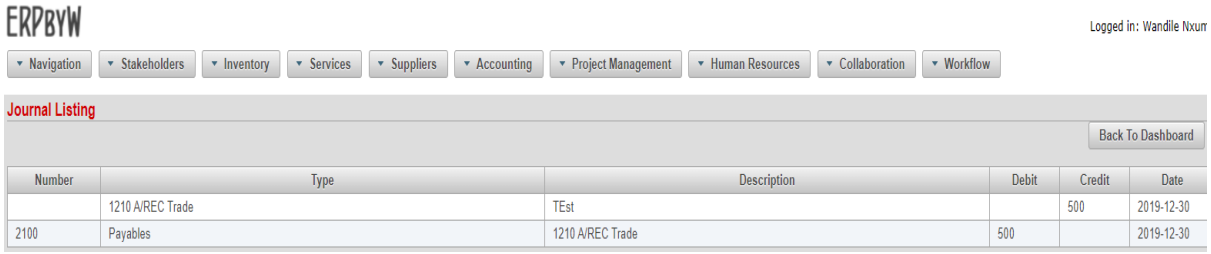

Each of the pre-defined accounts are either Receivable, Expenditure or Asset accounts which can accept transactions into them or allow them out. Each transaction is recorded in the Journal accordingly as either a Debit or Credit. To process a transaction in or out of an Account, follow the steps below.

From the menu, click on ‘Accounting – Search Account’. On the screen that appears, you can either click on ‘List All Accounts’ to simply list all defined accounts, or type in the search criteria and click on ‘Search’ to narrow the results.

From the search results, select the account you would like to view by clicking on the tick next to it.

On the screen that appears, you can enter the amount being processed, comments and the date then click on ‘Save’.

Transactions processed are posted to the Journal and shall appear as below.

Invoice

The system enables the creation of Invoices with just a few clicks.

Linked Modules

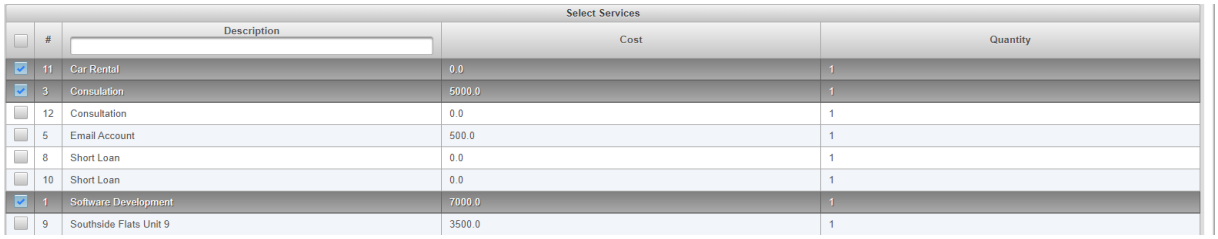

Invoices are linked to Inventory, Services and Stakeholders which are consumed during the creation of an Invoice. Projects are also linked by the final Project Costing.

Create New Invoice

To create a new Invoice, from the menu click on ‘Accounting - Invoice’.

On the Dashboard screen, click the add button depicted by a plus sign. Select the Stakeholder or Client for which the Invoice is being created. To narrow the list down type in the name of the client in the available field. Once identified, select the client by clicking on the tick next to the record.

Select the Services you would like to add to the Invoice if any, and click on ‘Next’.

Select the Inventory you would like to add if any, then click ‘Next’.

The items added to the Invoice will appear on the next screen. At the bottom of the screen, select whether the Invoice is Recurring or not, enter an Order Number if valid and capture

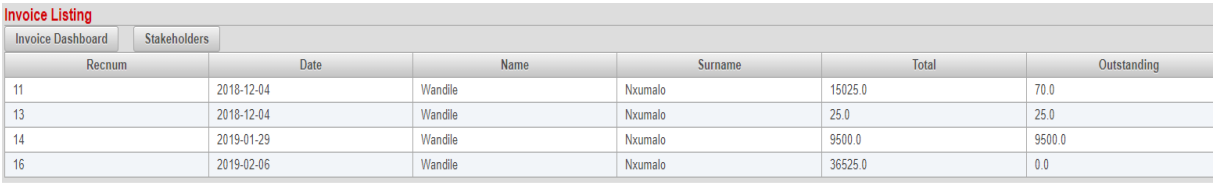

the Date of the Invoice. If Recurring is checked, you will get reminders about the Invoice each time you log into the system near the Invoice date. If the Invoice is being created based on an order that was placed, that order number, reference or comments can be entered in the Order Number field. Only the date is mandatory.

Click on 'Save' when done and the Invoice will be presented on the next screen where it can be sent to the printer of PDF.

View Invoice

To view an Invoice, from the menu click on 'Accounting - Invoice', then click on the search button identified by a magnifying glass. Enter the Name of the Stakeholder for whom the Invoice was created, then enter the date range of when the Invoice was created, then click on the 'Search' button.

A listing of Invoices created for the Stakeholder in the range of dates specified appears in the list.

Invoice Listing

Invoice Dashboard | Stakeholders

Recnum	Date	Name	Surname	Total	Outstanding
11	2018-12-04	Wandile	Nxumalo	15025.0	70.0
13	2018-12-04	Wandile	Nxumalo	25.0	25.0
14	2019-01-29	Wandile	Nxumalo	9500.0	9500.0
16	2019-02-06	Wandile	Nxumalo	36525.0	0.0

Click on the Invoice you would like to view all details of and it will be displayed on the next screen; where you can also create a Receipt for the Invoice.

To create a Receipt for the Invoice, click on the 'Receipt' button. The next screen will display the Amount Due for the Invoice. If the amount is greater than 0, enter the amount which is currently been paid towards the Invoice and enter the Date, then click 'Save'. The amount that has currently being paid will be deducted from the outstanding amount and reflect on the Invoice as for example -5000 if the amount of 5000 was paid as in the below Invoice.

Name	Vusi
Surname	Ndwandwe
Telephone	
Cellphone	76114484

Tablet	1	0.0	0.0
39	0	0.0	-5000.0

Total 7000.0

If the Invoice is older than 30 or 90 days and not payment has been received, the system will calculate and display the penalty percentage as it has been specified in Administration.

Quotation

The system enables the creation of Quotations with just a few clicks.

Linked Modules

Quotations are linked to Inventory, Services and Stakeholders which are consumed during the creation of a Quotation.

Create New Quotation

To create a new Quotation, from the menu click on ‘Accounting - Quotation.

On the Dashboard screen, click the add button depicted by a plus sign. Select the Stakeholder or Client for which the Quotation is being created. To narrow the list down type in the name of the client in the available field. Once identified, select the client by clicking on the tick next to the record.

Select the Services you would like to add to the Quotation if any, and click on ‘Next’.

Select the Inventory you would like to add if any, then click ‘Next’.

The items added to the Quotation will appear on the next screen. Capture the Date of the Quotation which is mandatory.

Click on ‘Save’ when done and the Quotation will be presented on the next screen where it can be sent to the printer of PDF.

View Quotation

To view a Quotation, from the menu click on ‘Accounting - Quotation, then click on the search button identified by a magnifying glass. Enter the Name of the Stakeholder for whom the Quotation was created, then enter the date range of when the Quotation was created, then click on the ‘Search’ button.

A listing of Quotations created for the Stakeholder in the range of dates specified appears

Click on the Quotation you would like to view all details of and it will be displayed on the next screen.

Receipt

The system enables the creation of Receipts with just a few clicks.

Linked Modules

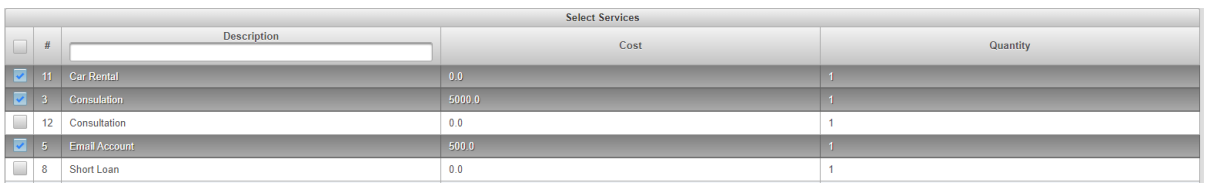

Receipts are linked to Invoices for which Receipts can be generated when a payment is made with reference to the Invoice. A Receipt can only be generated for an Invoice from the Invoice Preview. Inventory, Services and Stakeholders are also linked when they are consumed during the creation of a Receipt.

Create New Receipt

To create a new Receipt, from the menu click on ‘Accounting - Receipt.

On the Dashboard screen, click the add button depicted by a plus sign. Select the Stakeholder or Client for which the Receipt is being created. To narrow the list down type in the name of the client in the available field. Once identified, select the client by clicking on the tick next to the record.

Select the Services you would like to add to the Receipt if any, and click on ‘Next’.

Select the Inventory you would like to add if any, then click ‘Next’.

The items added to the Receipt will appear on the next screen. Capture the Date and Amount being paid which are mandatory.

Income

Click on ‘Save’ when done and the Receipt will be presented on the next screen where it can be sent to the printer of PDF.

View Receipt

To view a Receipt, from the menu click on ‘Accounting - Receipt, then click on the search button identified by a magnifying glass. Enter the Name of the Stakeholder for whom the Receipt was created, then enter the date range of when the Receipt was created, then click on the ‘Search’ button.

A listing of Receipts created for the Stakeholder in the range of dates specified appears

Click on the Receipt you would like to view all details of and it will be displayed on the next screen.

6. Project Management

The Project Management module serves as a platform to manage projects from which organisations can define and manage tasks, activities and resources consumed by a project.

Linked Modules

The module has several supporting modules which contain specific data about resources consumed by a project. Linked modules include Stakeholders, Inventory, Accounting and Human Resources.

Create New Project

To create a new project, from the menu click on 'Project Management – New'. Enter the details of the Project and click on 'Save'.

Users are only able to add activities and resources to a project after it has been successfully saved.

View Project

To view a project, from the menu click on 'Project Management - Search'. Enter the variables with which you would like to search with then click 'Filter'.

The projects matching the search results will appear in the list. Select the project you would like to view and you will be redirected to the Project Management screen.

To identify the functionality of the button, hover your mouse over them.

The 'Edit' button will allow you to edit the details of the project which have already been saved. You must also use this option to change the status from when the project has has begun etc.

Project Manager

The 'Update Project Manager' button will allow you to select a manager for the project. The Project Manager is selected from the existing employees defined in the Human Resources module. Only employees defined at *Supervisor*, *Manager* or *Board* level will appear to be selected as Project Managers. Once you have selected the employee click on 'Save'. The screen may have to be refreshed by clicking on the refresh button for the selected Project Manager to be displayed.

Project Stakeholder

The 'Update Stakeholder' button will allow you to select a Stakeholder directly involved in the project. The Stakeholder is selected from the defined Stakeholders in the Stakeholder module. Once you have selected the stakeholder click on 'Save'. The screen may have to be refreshed by clicking on the refresh button for the selected Stakeholder to be displayed.

Tasks

Each project is made up of several Tasks, and each task consists of several Activities. A task must be defined to as a global entity under which activities must fall. For example, a Project can include a task called *Fencing*, under which Activities such as *buying poles* and *putting up the fence* may exist. To define a new Task, click on the plus sign in the Task section. The progress of a task is determined by the *Number of Complete Activities* under the task. Hence if there are two activities under a task, and one is complete, then the task progress is at 50%.

Once tasks are defined, they can be viewed by clicking on the Drop Down box in the section where one can view tasks with the statuses of 'Not Started', 'Started', 'Completed' and 'Ended'. Tasks appear according to the date range in which they are set to occur on the Timeline component of the Tasks section.

To view all details about the task, click on 'details' and the details will appear above the Tasks Timeline.

To add an Activity to the Task, click on 'Add Activity', capture the details of the task then click on 'Save'.

To view Activities which have been added under the Task, click on 'view activities' and they will appear in the Activities Timeline below that of the Tasks.

To update the Task, click on 'update' and edit the relevant details.

To delete the Task, click on 'delete', and confirm that you would like to delete the activity.

Activities

Each Task is made up several Activities. The Activities defined the specific work which will carried out for the Task under which they are defined. To define a new Activity, ensure that the Task is viewable then select 'add activity'. Then to view Tasks under an Activity select 'view activities' from the Task.

Once an Activity appears in the Activity section Timeline, you can view all details by clicking on 'details'. The details will appear above the Timeline in the Activities section.

To update or edit the activity, click on 'update' and alter the details as necessary then click on 'Save'.

To assign an employee to work on the Activity, click on 'assign' where you are given the option to select from all employees defined in the Human Resources module. Once selected, click on 'Save'.

To delete the Activity, click on 'delete' and confirm that you want to delete the Activity.

Employees working on Activities can link Inventory that they are consuming in the course of their work. To add Inventory to a Project, from the menu click 'Inventory – Add To Project'. A listing of all current projects that the organisation is undertaking will be listed. Select the

project for which you would like to add Inventory by clicking on the tick to the right of the Inventory.

Inventory can only be added to a specific Activity of a Project, hence the Activities of the selected project will be displayed. Select the specific Activity that you are adding Inventory for by clicking the tick. You will then have to select all the Inventory you are adding to the Project then click on 'Next'.

7. Collaboration

The Collaboration module is a platform enabling teams to be able to effectively communicate while carrying out their duties. Teams are defined which depict the content a specific team can access. Document Management is also at the core of the module; where documents can be uploaded, specifying which team can access that specific content.

Create New Team

From the menu click on 'Collaboration - Teams' then click on the button with a plus sign. Capture the name of the team, set the type and specify the individuals which can have access to content uploaded to for that team by capturing their email addresses in the email addresses field. Click save when done.

Search Team

From the menu click on 'Collaboration - Teams' then click on the button with a magnifying glass. Capture the description of the team then click on 'Search' button. Several search results may appear, select the team once identified and you will be redirected to details of the team.

To edit the team, hover your mouse over the buttons on the screen above the details and select the 'Edit' button. Edit the details then click on 'Save'.

To delete the team, hover your mouse over the buttons on the screen above the details and select the 'Delete' button.

Document Management

Upload New Document

From the menu click on 'Collaboration – Document Management' then click on the 'Choose' button. You will requested to select a document from your computer. Note that the application allows the uploading of all types of files. Select the file or several files then click on 'Open'. The file name will appear on the screen. Click the 'Upload' button to begin the upload. The operation can be cancelled by clicking on 'Cancel' while uploading. Once the file has been uploaded, you will be redirected to a screen where you need to assign a Team to the document. Remember that teams have already been defined and that they determine which group of users can access this file. The comments you capture on this screen will could be discussion points that the team will make a note of when viewing the document. Click on 'Save' when done.

Search Document

From the menu click on ‘Collaboration – Document Management’. The screen that appears contains a ‘Filter’ section. In that section you can filter the documents you would like to view by capturing either the range of dates the document was uploaded, or selecting the team under which the document was uploaded. All search options can be used to narrow down the results. Click on ‘Filter’ and the results will appear in the list below the search. Click on the document once you have identified it and you will be redirected to a screen displaying the details and any comments which have been added by any team member of the team the file was uploaded under.

To view the file, click on the ‘View Document’ button.

To add a comment for discussion, capture your comments in the available text box then click on ‘Add’. Your comment and all others that have been added will appear on the screen. This was discussions can happen with all traces displayed on the screen so each team member can easily follow and take part as necessary.
