## **ERPbyW – Implementation and Support Plan**

Version 1.0

24 August 2019

### **1. About ERPbyW**

ERPbyW is Enterprise Resource Planning software developed by Wandile Nxumalo; who is an independent software development specialist. The software is currently focused on Project Management, where almost all functionality is linked to any form of work being carried out within an organisation. The software also contains basic accounting functionality and can be integrated with other systems if required.

### **2. Current Mode of Operation**

The software is currently in the final stages of development; where it is being customised according to recommendations made by prospective clients. Once the software is considered to be of an acceptable standard and a number of prospective clients have documented interest towards implementing the software within their organisations, funding shall be raised towards the establishment of an organisation.

### **3. Establishment of Organisation**

The estimated date of establishment/registration of the organisation is January 2020.

Funding towards the establishment of an organisation shall be in two ways;

1. Bank Loan
2. Share Sales

The organisation shall operate anywhere between Mbabane and Manzini.

### **4. Support Plan**

The founder of the organisation (Wandile Nxumalo) shall not make a part of the human resources but will participate at Board Level.

The organisation shall commence operation with the below jobs;

- a) 1 Office Administrator

- b) 1 Senior Analyst Programmer
- c) 2 System Administrators

#### **4.1 Employee Job Specifications**

##### **A) Office Administrator**

General office administration including human resources and accounting.

*Requirements:* Bachelor of Commerce in Business Administration or related qualification with at least 2 years relevant experience.

##### **B) Senior Analyst Programmer**

This position requires a specialist, hence if no Swati nationals qualify, it may call for a foreign national to be recruited. Should a foreign national take up the position, he/she shall train a local Swati Graduate Analyst Programmer for a period of at least three years.

- Liaising with clients to ensure that the system fully meets their requirements
- Supervision of System Administrators
- Research and Analysis of industry trends for implementation on software
- Development or updating of system with additional requirements collected from clients
- Business Process Re-Engineering for performance, user friendliness and meeting international standards
- Representing the organisation in meetings, events and presenting to the board.

*Requirements:* BSc Information Technology or related qualification with at least 5 years fulltime development using Java (JEE, JSF, Web Services, JPA, JDBC, J2SE). Oracle Certified Java Programmer/Associate Certification an added advantage. Knowledge of MySQL or any other relational database.

##### **C) System Administrator 1**

This position requires a specialist in the Windows environment, who shall be responsible for setting up the software on client infrastructure (network and hardware) and providing training and general support to the client and within the organisation. System Administrators will report to the Senior Analyst Programmer and provide support to him/her where necessary in the areas of System Testing, Deployment etc. The position requires a professional with at least 5 years' experience and good knowledge of security.

##### **D) System Administrator 2**

This position requires a specialist in the Linux environment, who shall be responsible for setting up and managing the local or remote server for the organisation, which will host the application for all our clients opting for cloud or remote access. System Administrators will report to the Senior Analyst Programmer and provide support to him/her where necessary

in the areas of System Testing, Deployment etc. The position requires a professional with at least 5 years' experience and good knowledge of security.
